

VIDREPUR

G L A S S M O S A I C

THE COMPANY

Vidrepur has been a **leading company** in the manufacture and sale of glass mosaics for twenty years.

The company has its main production site in Castellon, with delegations in USA and Mexico.

The company has more than 4000 distributors and a marked presence in the International market.

VALUES

Our glass products are made up of **99% recycled materials**.

Since our origins, the care and respect for the environment in all its facets has been a fundamental and differentiating value that supports our company.

With the manufacture and distribution of our glass mosaics, we promote design and construction that leads to a significant reduction of the negative impact that the construction of buildings has on the environment.

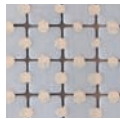

CERTIFICATIONS

Vidrepur holds the necessary certifications for its products which have been submitted to strict quality controls according to UNE (Spanish) standards, thereby guaranteeing optimal performance.

GLASS MOSAIC PROPERTIES

The product is delivered in 317 x 317 mm plates, with pieces stuck on adhesive paper, on glass and polyester fibre, or on mesh dots. Due to its non changing, easily fixable and cleanable nature, these are the perfect decorative tiles, ideal for swimming pools, facades, columns, interiors, bathrooms etc. The use of glass and colour gives more decorative and suggestive solutions.

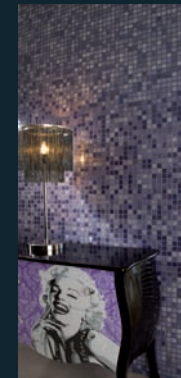

THE COLLECTIONS

We have a wide and versatile set of collections. Our product range can be classified in three basic categories:

  Collections designed for wet zones, such as swimming pools, spas etc, whose intrinsic characteristics make them ideal for this, and collections designed to decorate any space, some of which are also usable in wet areas.

  Collections that are derived from the mix and combination between of references, giving attractive and different mixes with a wide use, as a result.

  Lastly, we give special mention to the fact that Vidrepur has a product and design development department which, having carried out studies based on trends, technical and market demands, is in a continuous process of development.

COLORS 25x25 mm

**Within the Colors series, there are references to "plain" and "fog" colours, which due to their design, offer a de-toning aesthetic affect when in place.*

These references are also available with an anti-slip finish.

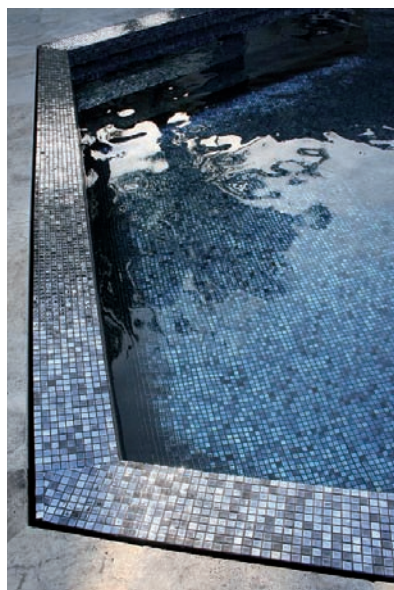

Characteristics

The Colors series has been Vidrepur's **basic collection** since the firm's beginnings.

Made up of a wide range of colours, this collection has the necessary characteristics for tiling wet areas, such as swimming pools, spas, public bathrooms etc., and is the most affordable of the ranges in our catalogue.

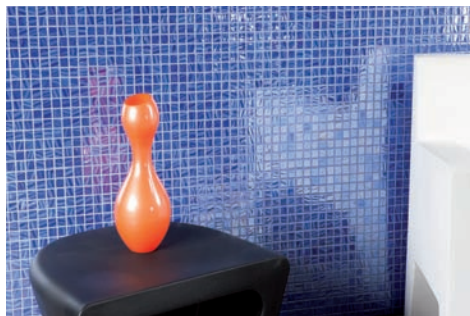

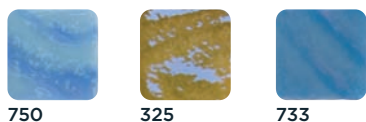

The range of whites and the large variety of blue tones **are widely used in private swimming pools as well as in pools in hotels, resorts and public spaces.**

The product's technical characteristics ensure it fulfils the **hygiene and anti-slip conditions** required of these type of projects.

The Colors collection is also sold in 4x4cm y 5x5cm formats.

TITANIUM 25x25 mm

Characteristics

The Titanium collection is designed for projects in which the **decorative aspect** is very important.

The collection is made up of a wide chromatic range, and **the gloss and brushstroke shades with contrasts in colour** make this collection an attractive solution to combine with other materials, such as ceramics, natural rock etc., allowing.

Titanium to be used as a decorative complement or to tile smaller sized wet areas such as showers, specially decorated areas in spas, swimming pool decorations, friezes in bathrooms and kitchens etc.

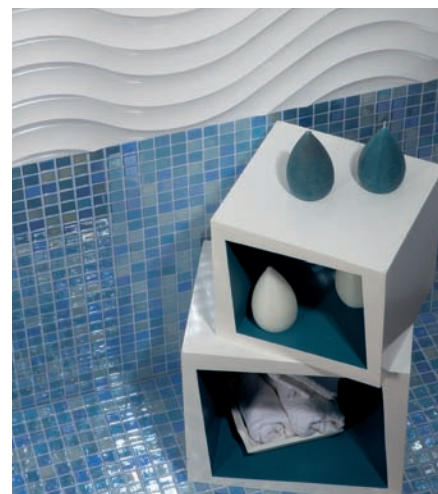

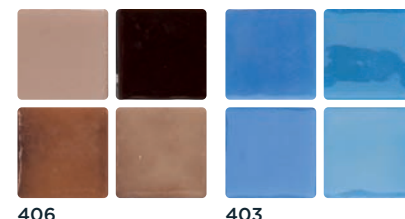

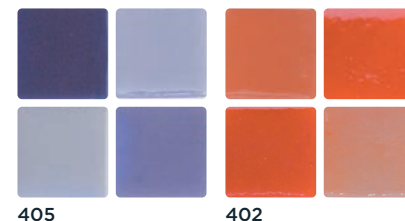

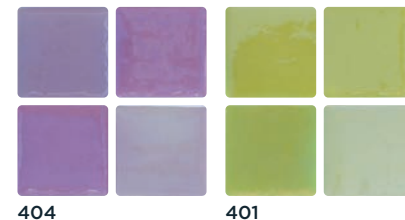

Titanium is a collection with a high added value, and as a result we at Vidrepur also offer the possibility of **mixing** this collection with the Color collection, enabling attractive compositions to be designed.

25x25 mm LUX

Characteristics

Lux is made up of seven colours, where each one has **different tones** within the mesh, offering a mix appearance with a lot of gloss and **living colour**.

401 pistachio green is a colour that combines very well with whites in **bright kitchens**.

The intense blue of the 403 can also be used in swimming pools and bathrooms.

The most original colours, such as 404 or 405 are slightly more affordable options than the original Titanium collection.

The chocolate and grey tones are more sombre but combine well to decorate more minimalist spaces, with material such as cement, smooth or metallised marble.

As it is a very special series, we believe that it is very competitively priced, with an excellent price quality ratio.

ESSENTIALS 25x25 mm

Characteristics

Fun, with solid colours and a **satin matt feel**, this collection completes Vidrepur's range of gloss and structured mosaics.

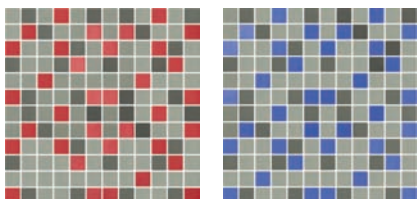

With a chromatic range designed to match all types of decoration and be combined with other collections, and so create the contrasts that are so valued today in the decoration world.

Essential is divided on the one hand into **basic colours**, made up of colours within the range of greys and browns, and on the other into the Fresh section, made up of **bright, fresh, fun colours**, capable of giving a touch of colour to any room.

We combine this series with the MOON series to make sets and contrasts and we also combine other colours between themselves to create bright mixes.

This product is categorised. We like Essential to create combinations, for example with matt and satin feel ceramics, in **modern kitchens**, and combined with living coloured furniture.

25x25 mm ARTS

Characteristics

Arts is a collection designed following the strict criteria of **strong personality**.

Made up of a range of current colours, greys, anthracites, **metallics, golds and with brushstrokes giving texture**, which offer the mesh diversity.

This is a **top of the line range**, very attractive for decorators and prescribers, and it offers a decorative **solution to other interior tiling materials**.

Top hotels and prestigious buildings have used this collection to add a touch of sophistication to their spaces.

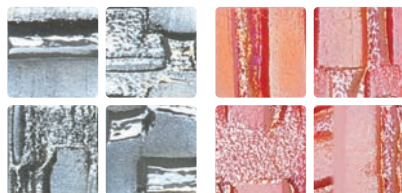

The Arts collection, with mesh made up of 1x1cm tessellas, is a top of the range choice for those consumers seeking differentiation and glamour in their projects.

It is ideal for **friezes** or complementing large areas in a decorative way, in any living area, restaurant, hall, hotel etc.

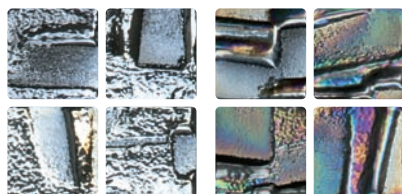

MOON 25x25 mm

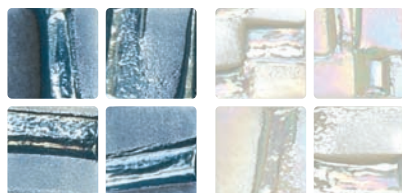

658

650

659

651

660

652

Characteristics

Vidrepur's new collection radiates creativity, **metallic sparkle and contrasts** all in the same tessella, creating in each mesh a wide variety of designs and **combinations of textures and shades**.

This is a top of the line collection and in itself can be used to decorate small areas such as a decorative column in a bathroom or a metallic coloured border in a modern kitchen.

The white Moon colour combines well as a decoration with any base colour and the metallic colours are available as golden shades, darker and more silver looking.

This **luxurious product range** is very good choice when combined with steel, cements and minimalist materials, as it is by itself a very rich piece. It is also **available in 2.5 x 5 cm format**.

25x25 mm MEZCLAS

Characteristics

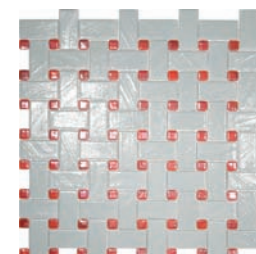

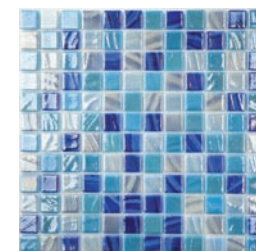

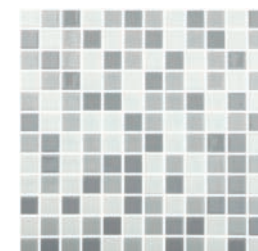

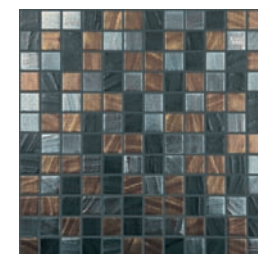

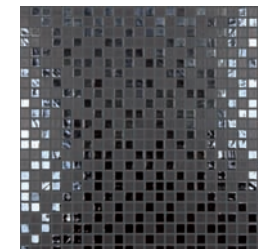

Vidrepur has a great offering of **catalogue mixes**, where different criteria are used for composition: **texture mixes** and gloss-matt finishes, **mixes of colours** to produce surfaces with design and chromatic varieties, mixes between more affordable products with some shades of higher value added references.

Offering, as a result, **attractive and special mixes** for swimming pools for example.

www.vidrepur.com

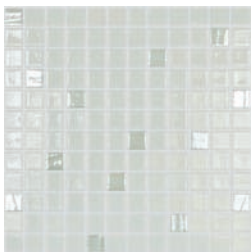

There is a mix generator on our website that allows you to generate your own mixes.

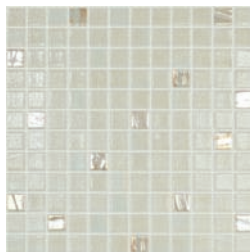

And finally mixes made up of **different formats** making tapestries to create attractive decorations.

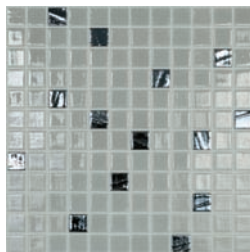

COLOR PLUS 25x25 mm

Diamante

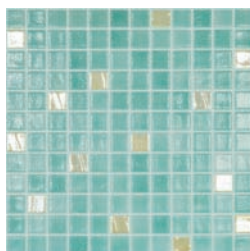

Topacio

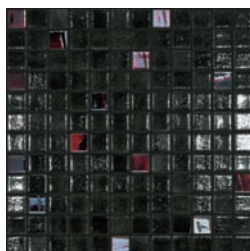

Obsidiana

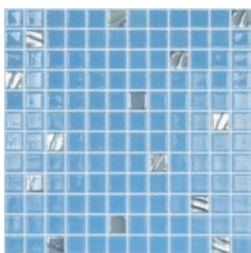

Aguamarina

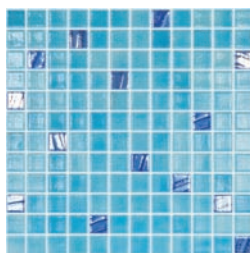

Jade

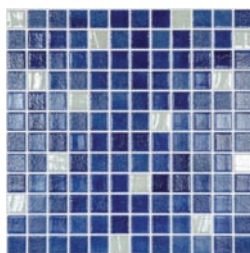

Azabache

Agata

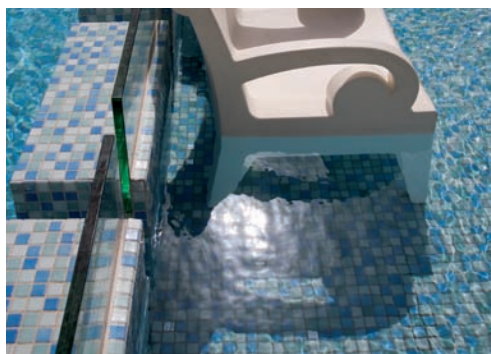

Turquesa

Zafiro

Characteristics

With the need to offer our clients an ever more differentiated product, destined mainly for swimming pools, bathrooms and wet areas, Vidrepur has developed **mixes made up of the Colors collection with sparkles of Titanium** to given it a **high value added** and at the same time offer a **competitive price**.

The mixes of the Colors Plus series can give a swimming pool a **more attractive appearance, lighter** and with a more elaborate design.

Color Plus is a sure, **affordable and commercial** bet for those who are looking to differentiate their projects.

ATELIER LAB

TAILOR MADE

Vidrepur develops its products taking into consideration the needs of decorators and both regular and interior designers.

* If you can not find your texture of colour in this catalogue, please contact us.

We will help you develop your exclusive piece for your project.
